

PREVOST®

THE ULTIMATE EXPERIENCE

3-POINT SEAT BELT RETROFITS

PrevoSt now offers a 3-point seat belt retrofit for **PrevoSt H Series Coaches** manufactured from 1998 through 2008 and **XL-II and X3-45 Coaches** manufactured from 2000 through 2008. PrevoSt has developed a retrofit procedure for upgrading older coaches not equipped with 3 point Passenger Seat Restraint Systems that includes replacing existing seats and reinforcing of the seat track and rail. This system is available for both wheelchair and non-wheelchair equipped coaches. Other available options include the addition of 110 volt outlets and WiFi. The PrevoSt Retrofit is not just a bolt-through-the-plywood fix. Instead, it incorporates reinforcing the seat track to the structure and reinforcing the side rail. This retrofit provides a better G-force rating to coincide with pending federal guidelines.

For more information or to schedule retrofits for your coaches, contact your nearest Service Center or Regional Parts or Service Manager.
