

COMMUNICATE with Prevost Liaison

KEEP YOUR COACH CONNECTED

Prevost Liaison 2.0 is a state-of-the-art vehicle management system that provides key operating information via wireless communications and the Internet. The system keeps you connected to your motorcoaches and drivers anywhere, anytime, from any computer or mobile device. Using a cellular network, Liaison 2.0 has the most reliable communication, efficient data transfer, and many advanced features, all in an easy-to-use interface.

Information provided by Liaison increases fleet efficiency, improves customer service, enhances driver training and more effectively handles troubleshooting and maintenance. Provided as standard equipment on all new Prevost and Volvo coaches, this system is a valuable tool to increase productivity, improve safety, and reduce operational costs while monitoring driver and vehicle performance.

MAXIMIZE UPTIME

Prevost Liaison continuously monitors many electronic systems on your motorcoach including:

- Engine
- Transmission
- ABS System
- Tire Pressure Monitoring System
- Diesel Particulate Filter
- Prevost Electronic Stability Program

The system reads fault codes from the motorcoach's electronic systems and builds a daily report of all faults, together with the ECU hardware and software part number.

Mission critical codes are filtered and sent in real-time on occurrence via email to your computer or mobile device. The mission critical faults come with a snap shot of several parameters indicative of the vehicle state when the fault occurred. For example, engine running or not, vehicle speed, engine temperature and more. This extra information greatly helps in troubleshooting.

PREVOST® LIAISON

IMPROVE EFFICIENCY

Liaison lets you monitor the vital statistics of each motorcoach at any time, or on a set schedule. Data can be transferred every 5, 10 or 15 minutes. Vehicle performance reports can be scheduled weekly or up to 3 times per day. These reports include information on:

- Fuel use, distance traveled, and resulting MPGs
- How often vehicles are in the *RPM sweet spot*
- Adherence to preset speed ranges
- Use of cruise control
- Idle time and fuel used
- Weekly fuel use, summarized by coach (to reduce the possibility of fuel theft)
- Factors connected to safe driving practices (Prevost ESP)

DELIVERING CUSTOMER SUCCESS

Prevost is the only motorcoach manufacturer to develop their own integrated, telematics system specifically for motorcoaches and, with the US07 introduction, the first to introduce telematics as standard equipment.

All the hardware and system features were developed by Prevost and Volvo, global suppliers of motorcoaches and transportation systems, to operate in the most demanding motorcoach environments. And, as with all factory-installed systems, Liaison 2.0 has Prevost's 2-year warranty.

IMPROVE YOUR BOTTOM LINE

Driver/Dispatcher Messaging

Prevost Liaison 2.0 provides pre-set or customized messages from *dispatcher to a driver* from *driver to dispatcher*.

Link to Existing Management Systems

Connections from Liaison to transport management systems are supported through an application programming interface (API).

Vehicle Location

Vehicle tracking can be done at any time or on a set schedule. Information is available quickly and includes latitude / longitude and elevation data, engine status, and direction, speed and odometer readings. See the entire route history of each motorcoach, even if the vehicle is inside a building.

Mileage Guide

Lets users easily find the most economical fuel stops along their chosen route.

Online Fuel Tax Tool

Prevost Liaison logs and reports fuel taxes, so you can file taxes for all your vehicles simply by going online, saving time and expense.

Logistic Services

Connecting your motorcoach and driver with the dispatcher gives you a competitive advantage when it comes to delivering outstanding customer service.

Automatic Notification

Prevost Liaison will tell you when your motorcoach nears its destination automatically, without requiring the driver to send a message.

Location-Based Services

See where your motorcoach is, or check for out-of-route mileage.

Routing

The Prevost Liaison Mileage Guide allows you to locate, display and save all your preferred routes and points of interest. Better routing saves you money by minimizing unnecessary mileage and improving driver efficiency.
